Overview

The CCI internally multiplexed MultiBand array is a fourteen port antenna, with eight wide mid band ports covering 1695-2400 MHz, two wide low band ports covering 698-896 MHz and four frequency specific low band ports covering 717-728 MHz and 758-798 MHz (over distributed diplexing).

The antenna provides the capability to deploy dual 4T4R (4x4 MIMO) in the Mid Band, with a separate RET control. The antenna also provides the capability to provide independent RET control for B29 and B14/B12 operations.

CCI antennas are designed and produced to ISO 9001:2008 certification standards for reliability and quality in our state-of-the-art manufacturing facilities.

Applications

- Dual 4x4 MIMO for the Mid band ports and 2x2 MIMO on B29 ports and 4x4 MIMO on B14/B12 ports
- Ready for Network Standardization on 4.3-10 connectors
- With CCI's multiband antennas, wireless providers can connect multiple platforms to a single antenna, reducing tower load, lease expense, deployment time and installation costs
